

# commercial lighting solutions

By switching from fluorescent or incandescent lights to LED lights, your business will consume up to 40% less energy.

We offer high output LED lighting as well as motion controlled lighting. Lets discuss which option fits your business best!

Before

After

LED lights consume up to 90% less energy than incandescent light bulbs.

Lifespan of up to 100,000 hours compared to the 1,500 hours of incandescent light bulbs.

Save on A/C costs by reducing the amount of heat that goes into the building structure  
Surgical quality brilliant lighting.

# commercial radiant barriers

Radiant barriers can be installed to prevent radiant heat loss and heat gain.

This barrier will work with the building's insulation to help keep your office cooler in the summer and warmer in the winter.

Stops up to 97% of radiant heat transfer.

Lowers both heating and cooling costs, reducing energy expenditures throughout the year.

A/C savings of up to 12%

Made from Energy Star Low-E material.

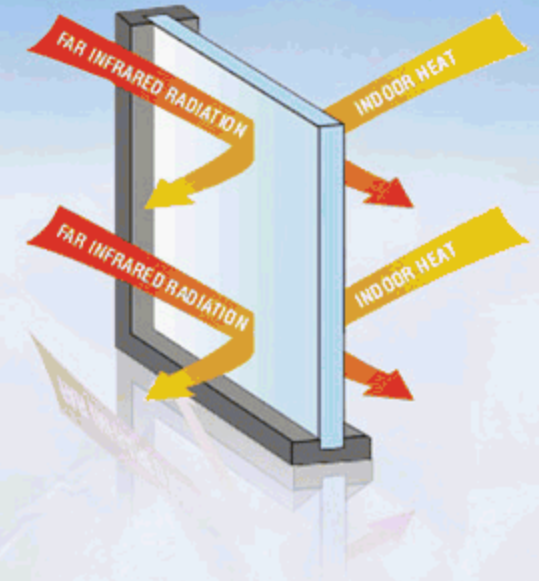

# low-e window coating

Our window coating offers a simple solution for energy efficiency.

Quick and easy to install, our window coating can reject up to 79% of the sun's heat and lower utility costs.

Our hurricane safety and security rated coatings are available for glass buildings and building windows.

Our films can cut from 12 to 93% of incoming light, eliminate 99% of UV rays, block 92% of glare and cut up to 76% of solar heat gain through glass.

Reduces cost of cooling by rejecting up to 79% of the sun's heat, and decreases heat loss in the winter up to 30%.
